NVD's & NAHS

Copies of the NVD's and National Animal Health Statements will be supplied with your new purchase.

By law, these must be kept for 7 years.

Rebates

We offer a 2% rebate to agents for introductions. This must be in writing to the conducting agents at least 24hrs prior to the sale.

Delivery of Purchases

As we have to truck the animals to the Mt Pleasant Showgrounds for the sale, we would prefer if you can pick them up on sale day. However, we are offering free delivery to Keith and can take animals home for collection later, or help with delivery. If you are unable to attend the sale, please discuss with us prior, as this makes it easier to organise deliveries. We work with various stud stock transport companies to deliver Australia wide (your cost).

Stud Ram Reserves

Rams requiring stud registrations, must meet a minimum standard and reserve price. Please have this conversation with us prior to the sale.

Insurance

At the fall of the hammer, your purchases are your responsibility. We encourage you to insure new purchases for at least 1 season. Our agents on the day will be happy to assist you with this.

Management of new purchases

Sale stock are disease and parasite free, recently vaccinated & drenched, however, we recommend you still do your standard induction protocol with your new purchases. Most likely you will be introducing them to a different diet, so consider this when introducing them to their new paddocks / feeds. Animals are likely to be nervous in unfamiliar surroundings, so we suggest you put them in a secure yard with a couple of other sheep for company while they settle, and give them feed and water there for a few days. Particular care should be taken that old rams don't fight with new rams. After your new rams have settled into their new surroundings, introduce them to a small number of your other rams, in a small yard, so they can't fight for a day or so, and then reintroduce this group back into your main line of rams.

Australian Sheep Breeding Values (ASBV's)

BT - birth type (single / twin / triplet)

Mating - AI (artificial insemination) ET (embryo transfer) N (natural)

BWT - Birthweight

TCP - Terminal Carcass Index

WWT - Weaning Weight

PWT - Post Weaning Weight

PFAT - Fat depth

PEMD - Eye Muscle Depth

LMY - Lean Meat Yield

IMF - Intramuscular Fat

SHRF5 - Shear5

LEQ - Lamb Eating Quality

LWT (kg) - physical weight in kilos (taken approx 1 month prior the sale)

Sheep Genetics

ASBV's gives us the ability to cut out the environmental effects (how well the animal's been fed / whether it's raised as a twin or single / and many more variables) and gives you an indication of its genetic potential. This gives you an indication of the traits that will be passed on to its offspring.

Index's (**TCP and LEQ**) are calculated by using different weighings on various traits to give an accumulative figure. Generally the higher the figure the more profitable the animal, but it's important to remember that ALL traits have effects (negative or positive) on other traits, so it's important to select for traits that will match your breeding objectives.

Animals with industry leading traits are highlighted. These animals are in the top percentages across ALL terminal breeds. This includes composite breeds which have hybrid vigour in that 1st cross [hybrid vigour enhances performance for usually 2 - 3 crosses and then reduces].

Pink – top 5% / **Blue – top 10%** / **Green – top 20%**

NOTE: While ASBV's are a valuable tool when making selections, it's important that stock are structurally sound and exhibit the qualities that you are looking for to improve or produce the style of sheep that you need.

CURLEW VALLEY SUFFOLKS

Welcome to my annual Mt Pleasant Suffolk Sale, in partnership with Belmont Props. This year I am offering 35 rams and 25 specially selected young ewes.

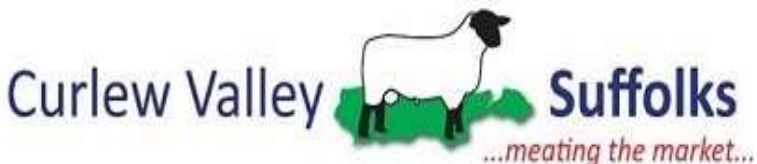

You will notice a few changes in the catalogue. We are including more ASBV's to indicate the sheep's genetic potential. Also I have moved to a later lambing, meaning my entire sale team is between 12 -14 months old.

I have been working hard to breed rams and ewes that have exceptional genetic potential and are structurally sound. We are thrilled to see how these animal's genetics compare to sheep right across Australia, and are seeing some impressive results. CVS is .2mm higher then breed average for fat (pfat), and .75mm higher then breed average for Eye Muscle Depth (EMD). We are also 1.41kg higher then breed average for weaning weight (WWT), and 15.28 for PWT which is 2.49kgs higher then breed average for Post Weaning Weight (PWT) and 1.24kgs higher then average across all breeds in the analysis. Our TCP average is 141.2, which is 13.27 higher then breed average. This means that the lambs will grow faster in those early few months, and finish earlier, which mean they can be sold at a younger age. Because we select for early growth and maturity, we have a lower then breed average mature weight.

With the increasing interest in eating traits we are thrilled to be leading the way with a flock average of -0.56 for Shearf5 which is -1.1 better then the suffolk breed average and -2.78 better then all terminal breeds in the SG analysis.

Lots 3, 4 and 5 are all in the top 5% of all breeds for both WWT and PWT with Lots 4 and 5 also being in the top 10% of all terminal breeds for TCP.

With a wide selection of rams and ewes on offer, I trust you find animals that match your breeding criteria. I would like to thank repeat clients for their loyalty and welcome new buyers.

BELMONT PROPS

Welcome to our Annual Ram Sale with Curlew Valley Suffolks.

I am pleased to offer 55 high quality Suffolk Rams together with a smaller offering of Suffolk ewes.

Sires of this year's team are Allendale, Telpara, Kurrali and a home-bred Belmont by Allendale 2092.

The Kurrali ram can be traced back to a Belmont ram that Kevin & Donna White of Neilrex, NSW, purchased after it was placed first in a class of 29 animals when Suffolks were Feature Breed at Adelaide Royal in 2017.

Our recent trip across to Bendigo Sheep and Wool Show in July, saw us witness the Champion Suffolk Ram broad ribbon given to Shelley Hedwards, with the ram's dam being a Belmont ewe, purchased via Auctions Plus at the 2021 sale.

Scanning, when most rams were still showing their lambs teeth, revealed some outstanding eye muscle measurements, the highest being 54. Extraordinary length of some rams will help put those extra chops on your prime lambs.

Thankyou to our clients who have given great feedback on the prime lambs produced as a result of Suffolk rams purchased from Belmont. I am a breeder who places great emphasis on the overall structure of the animal. In my mind, figures come second. I might be old-school. I don't need a computer to tell me the merits of my sheep!

The Border Leicester Rams – while without figures- are still producing the top-priced Border Leicester/Merino ewe lambs and 1.5yr BL/M ewes at the Mount Pleasant Off-shears Sale, and we thank our loyal clients for presenting these top quality offerings.

Thankyou to all of our previous purchasers, and a warm welcome to everyone here today. Best wishes with all of your purchases.

Neil Kroehn

Buyer of the top priced Suffolk Ram will receive

1 x 5 L Drum of Q-drench (worth over \$450)

In June this year, Rachel toured several middle eastern countries, including Egypt and Jordan. The photo above is of life for a farmer in Jordan!! The tents in the background are their houses. There are no fences because shepherds are with the sheep most of the time. It was rare to see a tractor, but they nearly all had a Hilux and a smart phone! In this area, they cropped amongst the rocks and reap with a hand sickle.

This photo was taken from the 8th floor of our hotel in Cairo, Egypt. Yes, we could see pyramids in one direction, and sheep living on the rooftop of the circled high rise building in the other direction. Animals in Cairo are very normal here. We saw sheep living on rooftops, and horses pulling carts along the roads, mixed amongst the vehicle traffic. Interestingly the Egyptians leave buildings in an unfinished state, because at the completion of a build, they must pay taxes and prove they own the land. So they just keep building up as the family expands.....no council approval needed!!well let's just say they are good at finding 'loop holes' ...

This is a line of this year's prime Suffolk lambs out of Belmont's self-replacing Merino ewe flock.

This flock finished up with 120% lambing – all ewes included, and not scanned.

NOTES

Please join us for refreshments

**Thankyou for attending our 9th annual
Mt Pleasant Suffolk Sale**

We look forward to watching our genetics perform in your enterprise, and welcoming you back next year to our 10th annual sale.

**2024 Sale Date
Wednesday 25th September**
